## GEOSPATIAL ASSESSMENT AND MAPPING OF URBAN PONDS IN PAYYANNUR MUNICIPALITY, KERALA STATE, INDIA

Starting Date : 10/08/2023

Ending Date : 03/01/2024

Goals : Mapathon

Grand Type : Individual

Total Budget : Rs 75000/-

Grantee : Dr. Bindu K B

Contact Details : [drbindukb@gmail.com](mailto:drbindukb@gmail.com), [bindugis@gmail.com](mailto:bindugis@gmail.com)

## Addressing Issues

### Project Presentation

4<sup>th</sup> November 2023

The present project is addressing two significant challenges.

- **The spatial availability of water resources in Payyannur municipality is not geospatially surveyed and recorded.**

In case of ponds availability only few ponds are identified and plotted early by Payyannur municipality but are not updated yet. Hence during the time of water scarcity, the governing body finds it difficult for provision of water availability and irrigation facility. Since there is serious issue of salt intrusion in available wells, canals, streams and river, local people depends on urban ponds for their water requirements.

- **Researchers specializing in water resource conservation and management the micro data is unavailable.**

Even though many research work are carried out in this regard but open accessibility of raw data and updating of data is not done yet. As the existing total ponds are not geospatially marked, researchers find it difficult to identify and derive data for their research work.

**Hence OSM being an open platform for receiving vector data and information, an initiative towards generating geospatially vectorized water resources data (pond details) in Payyannur municipality can be a solution for the above said two local challenges.**

## Target Project Outcomes

### Project Presentation

4<sup>th</sup> November 2023

- a) **The inventory of ponds geospatially** plotted within Payyannur municipality can be made available for the administrators which can be used in various water resource conservation and management strategies.
- b) **Conservation priority-based categorization of urban ponds** will be helpful for utilization of rejuvenation and maintenance funds as per the very high, high, moderate, low and very low priority.
- c) A micro level spatial data generated on OSM Kerala platform will not only help researchers to **derive data but also its methodology can be used for OSM mapping** and database formation of other water resources in the study area.

## Executing Plan

### Project Presentation

4<sup>th</sup> November 2023

Phases	Key Activities	Mile Stones	Time line (Month and Weeks(W))	Specific Requirements
I	Area Selection and Data Collection	Training	Month 1 – W1,W2,W3	Training support from the mappers
		Listing of ponds	Month 1 – W3, W4 Month 2 – W1,W2,W3,W4	
		Data collection	Month 3 – W1,W2,W3,W4 Month 4 – W1,W2,W3,W4 Month 5 – W1,W2,W3,W4	
II	Digitization	Pond mapping and Data entry	Month 1 – W3, W4 Month 2 – W1,W2,W3,W4 Month 3 – W1,W2,W3,W4 Month 4 – W1	
		Municipality Spatial Layers	Month 1 – W4 Month 2 – W1,W2,W3,W4 Month 3 – W1,W2,W3,W4 Month 4 – W1,W2,W3,W4 Month 5 – W1,W2,W3,W4 Month 6 – W1, W2	
III	Validation and Correction	Ponds Data	Month 1 – W4 Month 2 – W1,W2,W3,W4 Month 3 – W1,W2,W3,W4 Month 4 – W1,W2	Validation support from the mappers and validators
		Spatial Distribution and Data Editing	Month 1 – W4 Month 2 – W1,W2,W3,W4 Month 3 – W1,W2,W3,W4 Month 4 – W1,W2	

## Project Progress

### Project Presentation

4<sup>th</sup> November 2023

- ❑ 10/08/2023 - Project started on
- ❑ 11/08/2023 - Appointed a Field Assistant – Mr Anand O K
- ❑ 14/08/2023 - Discussed about the Research Methodology of the Work and scheduled the working plan for the project.
- ❑ 15/08/2023 to 20/08/2023 – Training for using QGIS 3.28 Software
- ❑ 21/08/2023 to 26/09/2023 – Started Thematic Mapping and Field Survey Sheet preparation

## Project Progress

### Project Presentation

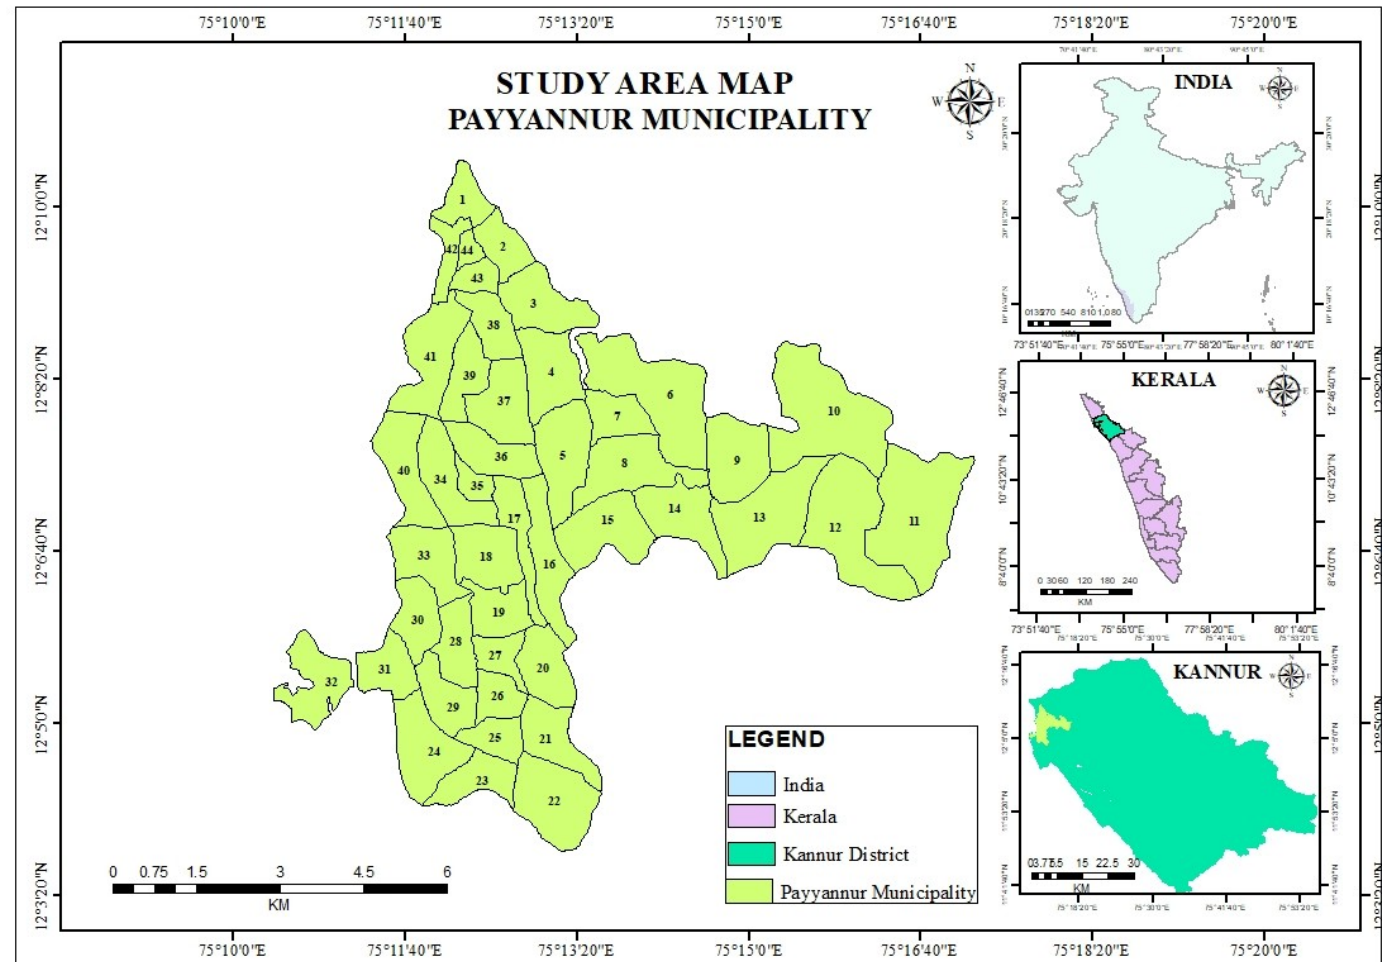

4<sup>th</sup> November 2023

- ❑ 09/10/2023 – OSM Training Workshop at Department of Geography, Kannur University
- ❑ 27/09/2023 – Started field data collection and survey based inventory preperation
